

INTRODUCTION

Multi-Lynx Companies, Inc. was established in 1993 as an engineering and applied sciences consulting firm. Since then, the company has grown and now provides total project management for capital facilities, or any combination of architecture, engineering, facility management, project planning and engineering management, computer engineering technology, and applied management sciences.

To meet the widening capital facility and program needs of government, business and industry, Multi-Lynx has structured its professional services for flexibility, breadth of scope and cost effectiveness.

Multi-Lynx is comprised of three major divisions, namely:

- i. Engineering
- ii. Computer Information Systems and Technology, and
- iii. Applied Management Sciences.

Currently, Multi-Lynx maintains a client base of approximately 70% private sector and 30% public sector. Multi-Lynx has performed work for federal, state and local government agencies, and for Fortune 400 companies.
