

Brief Description of Company Capabilities

Multi-Lynx **Geotechnical Engineering**

Multi-Lynx Companies, Inc. provides services for foundation engineering design and structural distress analysis, in addition to subsurface investigation, stability analyses, and geotechnical site instrumentation services.

Multi-Lynx **Environmental Engineering**

Multi-Lynx Companies, Inc. has expertise in all phases of environmental engineering analysis, including environmental impact studies, water quality analyses, waste disposal, wetland studies, environmental site remediation services, and brownfields development.

Multi-Lynx **Electrical and Mechanical Engineering**

Our expertise is in the areas of HVAC design, Energy Management, Fire Protection, Plumbing, Single and Combined Cycle Gas Turbines design, and Building Systems Management for commercial, residential, institutional and industrial applications.

Multi-Lynx **Water Resources Engineering** **Hydrogeology and Hydrology**

Multi-Lynx uses the latest and most appropriate technologies in the most efficient manner to ensure sound water management practice. By using technologies such as GIS and internet-based Data Management Systems, our professionals are able to integrate often competing concepts while at the same time maintaining adequate hydroperiods.

Multi-Lynx has extensive experience in the design, operation and management of public water supply projects, wastewater management, surface water and groundwater management.

Multi-Lynx **Engineering Management**

Multi-Lynx Companies, Inc. has the capability, experience, and expertise to provide services for all planning, scheduling, cost control, and all program development activities necessary for total project implementation.

Multi-Lynx **Computer Information Systems and Technology**

Multi-Lynx Companies, Inc. has subject matter expertise in the business technology field with a focus on client/server, web-based and infrastructure solutions. We provide infrastructure design, application development, testing, deployment, distribution, and maintenance and support. We provide our corporate clients with expert resources for managing all of their technology-related activities.

Multi-Lynx **Applied Management Sciences**

The division of applied management sciences of Multi-Lynx focuses on project economic and financial appraisal. We have substantial experience in various aspects of economic analysis, project evaluation using cost-benefit analysis, market demand analysis, project financing, investment decisions and risk analysis. Our work is enhanced by our active research in project assessment and managerial decisions under conditions of market uncertainty.
